General Capabilities

We Shrink Your Packaging Costs!

We began in 1992 with the idea to design and manufacture the best shrink packaging systems available in the market place. Our founder identified many limitations in current offerings and began from a clean sheet.

- Engineering Focused Designs
- Each System Designed for the Application
- Adapt New Technology As Soon As Possible
- Highest Possible Production Efficiency

Customer Focus

The key to success relies on partnership. Our customers know their products, and our design team works with their knowledge and input. We work to understand the best practices for product handling and transfer, maintenance schedules, and line efficiency expectations.

Understanding the way the operators interact with machinery is also critical. We have designed a profile based HMI with help screens to ensure the machine is making sellable products every day. The goal is to have the lowest cost of ownership over the life of the system.

Partnership Is Key

Our customers are our best sales staff. We work very hard to keep our customers satisfied, because we know that a positive reference makes the next sale easier. A partnership succeeds based on communication and service. Our job really begins after the sale:

- Engineering Review Before Manufacturing
- Free Factory Acceptance Testing
- In House Service Technicians
- Spare Parts Readily Available

Systems Approach

American Packaging Machinery, Inc. offers a complete line of fully automatic **Shrink Wrapping** machinery, and semi-automatic and fully automatic **Shrink Bundling** machinery. APM also designs and manufactures all of the **ancillary** machinery to complete the system.

The design and manufacture all of the product handling in feeds, our own machine programs, and the manufacturing and assembly are performed in-house. We take full responsibility for everything we do.

Design Capabilities

Seal Frame Sizes: 18" to 84" wide, Up to 24" High

Production Speeds: 1 to 150 Packages/ Minute

Side Seal and Trim Shrink Wrappers

Bottom Overlap (static and thermal drag) Shrink Wrappers

The Most Efficient Shrink Tunnels Available

Painted or Wash Down Stainless Steel Systems

In House Engineering Team

We Are Able to Meet Customer Supplied Specifications

UL Shop

All Manufacturing and Assembly Done In House

Category 3 Safety Experience
